

FIVE EASY WAYS TO Save on Energy Bills this Summer

Use a Smart Thermostat

Switch to a smart thermostat that automatically adjusts the temperature in your home. Follow [DOE recommendations](#) for thermostat setbacks with you're A/C.

Have Your Ducts Inspected and Sealed

Having a professional inspect and seal your ductwork can ensure that leaks aren't losing you money.

Use a Whole House Fan

Cooling using a [whole house fan](#) can substitute for an AC on some summer days in Michigan. Be sure to seal and insulate the fan when not in use.

Use Ceiling Fans

Run ceiling fans on your home's upper level and open the windows on the lower level. [DOE recommendations](#).

Check Your Home Insulation

Schedule an [Energy Audit](#) to learn about more ways to save, and understand if your old insulation is in need of an update. [Signs it's time to update your insulation](#).
